

Alsager School Gritting Plan

This policy has been produced with the safety of all members of the Alsager School community and visitors in mind during adverse weather conditions.

Procedures

The school will take the following steps to make the access and egress into school as safe as reasonably practicable.

The school site team will do their best to clear snow and ice on the pathways as shown on the gritting plan in blue making steps and slopes a priority. The gritting will take place before, after and at any other time during the school day as reasonable practicable. Whilst every effort will be made to clear snow and ice it must be remembered that every individual has a responsibility for their own safety and that of others. This means being aware of potential hazards walking or driving in icy conditions.

The school will review the effectiveness of the gritting policy before each winter or if circumstances change.
